

10th April, 2019

The Board of Trustees,
Breathe Easy Foundation,
United Kingdom.

Dear Sir/Ma,

LETTER OF APPRECIATION

This is to express our profound appreciation to the Board of Trustees and Management of the Breathe Easy Foundation (BEF), United Kingdom for their philanthropic activities and kind donations to the Asthma and Chest Care Foundation (ACCF) during their last visit to Nigeria in January 2019.

Mr. and Mrs. Dorcas Akeju with some other members of the team were with us to make donations of nebulizers, peak flow meters, both standard and low range, numerous Salbutamol and Seretide inhalers and other medications, for free distribution to patients. They visited the Chest Clinic, Obafemi Awolowo University, Ile-Ife, where similar donations were made to the Respiratory Unit and to patients who came for follow-up.

This is indeed a very thoughtful and kind gesture, especially in a country where most patients with asthma and chronic obstructive pulmonary disease are not able to procure their medications, resulting in poor disease control and increased mortality. Many patients have benefitted from this deed and I believe many lives have been impacted and saved by your activities.

Breathe Easy Foundation has been doing these charitable actions since partnering with us in the past few years. You are definitely making a great difference in the lives of others and posterity will never forget these great deeds. The Asthma and Chest Care Foundation appreciates all your donations and support, and we believe in your good cause.

May the Foundation (BEF) continue to grow stronger and may the financiers be blessed.

Once again, thank you.

With kind regards,

Prof. G.E. Erhabor, MBBS (IB), FWACP, FCCP, FRCP (Edin), FRCP (Lond.)
Consultant Pulmonologist & Professor of Medicine
Obafemi Awolowo University, Ile-Ife, Osun State.
Head, Respiratory Unit, Obafemi Awolowo University Teaching Hospital, Ile-Ife
President, Asthma and Chest Care Foundation
Governor, American College of Chest Physicians (ACCP)
